

# Find Your Way to the Cloud with GovCloud

Leading Cloud Services Consultant for Government Agencies

Understanding where the cloud can be leveraged to deliver services that address business needs is paramount. Organizations must understand ROI, security issues, architecture, and integration with existing systems. With so many options from vendors and hosters, making the right decisions early in the process is the key to avoiding costly mistakes and avoiding pitfalls.

## GovCloud has a three step approach to assisting our Government clients to the Cloud.

### LEARN

- Get the right information to support your decision making processes

### PLAN

- Build strong plans and strategies encompassing your business and technical requirements

### ADOPT

- Implementation, integration and migration. All key aspects and all services which Planet Technologies can deliver.

## Why GovCloud?

GovCloud, a Planet Technologies company, is uniquely qualified to assist government organizations with their cloud services decision making.

- Over 14 years experience in strategic government consulting
- 10 years experience providing business and technical best practices support to the world's leading hosters

## Awards
