

Smart decisions require access to relevant data. Federal Agencies do a great job generating volumes of information but the key is to be able to access and leverage the data when needed.

Microsoft has answered the call for a powerful enterprise search solution with its latest version of SharePoint — **Microsoft Office SharePoint Services (MOSS) 2007**. MOSS provides the ability to search enterprise data across multiple intranets, servers, and data repositories and then highlights the most relevant data in its business context. All this with sophisticated security features built in to help ensure that data is presented only to those authorized to receive it — an essential feature when managing sensitive data within an Agency.

Planet Technologies, a Microsoft Gold Certified Partner, has extensive experience with MOSS 2007 and has developed an **Enterprise Search Quick Start** designed to demonstrate the power and functionality of this latest search solution.

Using Microsoft best practices, Planet's Quick Start is a three-day, on-site engagement that will provide installation and configuration of MOSS 2007, provide knowledge transfer, demonstrate real-time search on your data and highlight the newest functionality of the solution. The three day engagement will include:

Day 1 (Server Setup and Installation)

- Configure and Standup MOSS 2007 Server
- Planet consultant will meet with appropriate staff to discuss configuration questionnaire and review goals

Day 2 (Search Configuration)

- Identify and define search criteria, file formats, locations
- Install appropriate iFilters
- Configure MOSS 2007 environment for maximum performance
- Crawl and index data sources

Day 3 (Demonstration & Usability)

- Showcase search results and target most valuable data sets
- Demonstrate relevancy and enhanced management
- Educate your key staff on scenario specific value of information
- Highlight newest functionality in MOSS 2007 including People Find, Latest User Interface and Management & Administration Functionality
- Demonstrate Office 2007 and Vista Integration

- * Minimum server requirements needed
- Dual Intel Xeon 3.6 GHz processors
 - (2) 20 GB SATA drives (10,000 rpm) minimum
 - 2 GB of system RAM (4 GB preferred)
 - Dual Gb Ethernet ports
