

Ready To Deploy Hosted Applications

DESIGNED AND DELIVERED BY PLANET TECHNOLOGIES

OVERVIEW

Planet Technologies is a leading developer and systems integrator with expertise in Microsoft-based technology solutions for organizations around the world.

We provide a range of services and solutions to meet the needs of Service Providers including Microsoft hosting solutions, provisioning and automation, identity management, data center operations and back-office integration.

The Planet difference: A unique Microsoft Partnership

Planet has a collaborative relationship with Microsoft which allows us to provide our clients with early, independent information about the latest technologies, build our extensive Microsoft knowledge into Planet solutions, and bring to our clients the benefits of a unique proximity to Microsoft solutions that few other companies enjoy.

Generate Additional Revenue and Attract New Clientele with Hosted Applications

To assist Service Providers in providing Hosted Applications to their clients, Planet Technologies has created a Ready To Deploy (RTD) Solution for Hosted Applications. Planet's turn-key RTD solution is designed for new and existing Microsoft Windows based hosters who wish to provide Software as a Service - even for applications that are not web enabled. Hosters can build upon their HMC platform or build a new Windows based hosting environment.

Planet's Ready To Deploy Solution is a fixed cost, fixed time engagement that provides the multi-tenant infrastructure necessary to provide automated provision and secure delivery of Applications via SoftGrid and Terminal Services. The RTD also provides the flexible platform capable of providing Hosting services for Microsoft Exchange, SharePoint and CRM to allow for a very dynamic catalog of hosting services and offerings.

Ready To Deploy Hosted Applications includes:

- Installation and configuration of solution
- A fixed time, fixed cost engagement model
- Prepared multi-tenant environment that allows for Desktop Application Hosting
- EAF web control panel for delegated administration and user provisioning
- Knowledge transfer: one-on-one, hands-on training by our hosting experts to get your team up to speed on the solution
- Online consulting for post deployment support with access to the Planet Technologies community server

Within weeks, Planet's Ready To Deploy Hosted Applications will enable Service Providers the opportunity to offer their clients a full suite of hosted applications.

Call Planet today to schedule your Ready To Deploy Hosted Applications.
