### Create a Customized Portal Solution in Weeks with Planet Technologies

Planet Technologies, a leader in providing Portal services to enterprises around the world, has developed a fixed fee, market ready Portal solution to allow your organization to reap the benefits of a fully functional Portal in weeks.

By leveraging the latest Microsoft SharePoint products and technologies including MOSS 2007, Planet's **Ready to Deploy Solution** includes installation and configuration of MOSS 2007, configuration and deployment of a standard site template based on your organizations requirements, set-up of 30 additional sites, and ample training to get your team up to speed.

### Planet's Ready To Deploy Solutions will provide your organization:

- A fully functional portal with supporting navigation structure
- A standard site template incorporating your organizations logo, font and colors.
- 30 sub-sites already created and a deployment plan for future sub-sites
- A sample form/workflow application
- 40 hours of onsite knowledge transfer
- Seamless integration with existing Microsoft applications:
  - Office SharePoint Server will be connected to your existing Microsoft Active Directory and Microsoft Exchange Server Infrastructure
  - Portal will support single sign-on based on your AD infrastructure
  - Portal will enable full text indexed search across your portal and other sites/file shares across your enterprise
  - Portal will support change control and document publishing workflow
